

NOTICE OF TREE TRIMMING IN NELSON

Between June 11 – Late Fall

TO ALL RESIDENTS

- *Nelson Hydro* will be proceeding with trimming trees around the power system within the City of Nelson as per our three-year trim cycle program.
- *Electrical Protection Rules* require 3 meters diameter around distribution lines and 5 meters around transmission lines.
- Nelson Hydro expects that by maintaining the three-year cycle, it will reduce the need to cut trees back dramatically each cycle, which will result in less visual impact in the community.
- By trimming the trees on a regular schedule, it also helps protect our hydro crews and the public from potentially falling branches due to weather events or aging/rotten trees.
- Trimming will continue into the late fall.
- Thank you for your cooperation and help to maintain a reliable power system.

Tree Trimming/Brushing Priorities:

#1 – Transmission Lines

#2 – Primary Lines

#3 – Secondary Lines

If you have any questions please call Nelson Hydro at 352-8240.

In Photo: Large branches have come down on power lines during a storm event in Nelson.
